Subject: Microsoft Settlement.

Hi,

This is Guoliang Qian, a Ph. D. in Computer Science from CUNY Graduate School.

What I would like to see:

1. Microsoft will document OS features and APIs in a complete and timely fashion.
2. Seperate from Microsoft OS development and application program development businesses.

What I would NOT like to see:

Force Microsoft to open the source of its Windows operating system.

Justification for the above:

To promote innovation and fair competition.

Thank you!

Guoliang
